MEMORANDUM

MARKS: 300

MARKING PRINCIPLES:

- 1. Penalties for foreign items are applied only if the candidate is not losing marks elsewhere in the question for that item (no penalty for misplaced item). No double penalty applied.
- 2. Penalties for placement or poor presentation (e.g. details) are applied only if the candidate is earning marks on the figures for that item.
- 3. Full marks for correct answer. If answer incorrect, mark the workings provided.
- 4. If a pre-adjustment figure is shown as a final figure, allocate the part-mark for the working for that figure (not the method mark for the answer).
- 5. Unless otherwise indicated, the positive or negative effect of any figure must be considered to award the mark. If no + or sign or bracket is provided, assume that the figure is positive.
- 6. Where indicated, part-marks may be awarded to differentiate between differing qualities of answers from candidates.
- 7. This memorandum is not for public distribution, as certain items might imply incorrect treatment. The adjustments made are due to nuances in certain questions.
- 8. Where penalties are applied, the marks for that section of the question cannot be a final negative.
- 9. Where method marks are awarded for operation, the marker must inspect the reasonableness of the answer and at least one part must be correct before awarding the mark.
- 10. In awarding method marks, ensure that candidates do not get full marks for any item that is incorrect at least in part.
- 11. Be aware of candidates who provide valid alternatives beyond the marking guideline.
- 12. Codes: f = foreign item; p = placement/presentation.

This memorandum consists of 15 pages.

2.1.4 Calculate the value of the closing stock using the FIFO method.

6

Give ONE reason in favour of changing to the FIFO method. $\checkmark\checkmark$ Incomplete / unclear reason: 1 mark

- Gross profit will be higher because closing stock would be higher
- Jackets are discrete products / Easy to count or identify jackets individually
- Value of jackets is continuously changing <u>and valued at more recent/realistic prices</u>

Give ONE reason against changing to the FIFO method.

Incomplete / unclear reason: 1 mark

- No need to change as profit will be the same in the long-term
- Unethical to manipulate the profit by changing the method of stock valuation
- Tax would increase in first year as a result of increased profit
- The change would affect comparisons across financial years

6.2.3 Identify ONE other problem relating to this business. Provide figure(s).

Figures ✓ Problem ✓ Accept valid alternatives

- Increase in VC/u from R65 to R80 / increase in FC of R190 000 / decrease in turnover by R235 000.
- A small percentage increase in selling price (9,4%) is not adequate to cover costs.
- Selling price of R175 is higher than the R170 of the competitor. Difficult to compete in the market for pots.
- Loss made in 2015: 4 725 000 (2 850 000 + 2 160 000) = (285 000);
 compared to profit in previous year of R220 000.
