NS-TECH GRADE 4 MEMORANDUM END OF 14 NOVEMBER YEAR END EXAM 2018

QUESTION	ANSWER	LEVEL
Question 1		
1. Which one is the end		_
consumer in the food	C – Hawk ✓	1
chain?	0 11: 14	4
2. Which one is an energy producer?	C – Hawk ✓	I
3. Which one is a source of	B – Loud speaker ✓	1
sound energy?	B - Loud speaker	•
4. Noise pollution can be	D – Blowing horns of a truck ✓	1
caused by	A – how high or low a sound is ✓	
5. Pitch is		
Ougstion 2 True or Folco		1 (5)
Question 2 – True or False 1. Sound occurs when		(5)
something vibrates	True	
2. All machines need input	Tiue *	
energy to work	True	1
3. Musical instruments	Tide .	_
produce light energy	False •	1
4. Noise and sound pollution are the same		1
5. Indigenous musical	True	ı
instruments of Zambia are		1
found in Zimbabwe	False	-
6. There are 9 planets in the	False	1
solar system.	False	_
Overtion 2 Match column		1
Question 3 – Match column A & B		(6)
1. Volume	C. How loud or soft a sound is ✓	
volanio	A. What is needed for things to	
2. Energy	happen Y	1
	E. To move to and from a place	_
3. Vibrate	with fast movements B. Stretch a string and let it go	1
4. Pluck	D. A form of energy •	1
4. FIUCK	1C 2A 3E 4B 5D	ı
5. Heat		
		1
		1
		(5)

	uestion 4 – Complete ntences			
	Earth moves around the			
2.	Earth is one of the 8	Sun✓	1	
2	Each living thing on Earth	Planets *	1	
ა.	Each living thing on Earth has its own – where it lives	Habitat ✓	1	
4.	The layer of air around the Earth is called	Atmosphere ✓	1	
5.	The are large pieces of land on the surface of the Earth	Continents *	00	(5) (20)
		EVEL 2 – Question 5		
1.	Write down two differences between the moon and the Earth	 Moon has no life. Moon does not produce its own light. Earth has life Moon orbits Earth, Earth orbits the Sun 	2	
		 Earth has an atmosphere Moon doesn't have an atmosphere (accept anything true) 		
			2	
2.	The moon orbits around the Earth while the Earth orbits around the	Sun✓✓	2	
3.	What creates the phases of the moon?	 The reflection of the sun on the moon Only the side facing the sun shows ✓ 	2	
4.	Draw and label moon, sun and Earth from biggest to smallest	Sun Farth Moon		(7)

The Earth The Earth is a planet 3. The Earth has an atmosphere 4. The Earth has living things 5. The Earth orbits around the sun 6. Is part/is not the centre of the solar system 7. The Earth does not produce its own heat and light, but gets it through radiation from the Sun LEVEL 3 – Question 7 1. Why is the Earth called the blue planet? 2. What is the surface of the Earth made of? 3. What is the Atmosphere important for life on earth? 4. Why is the atmosphere important for life on earth? 5. Explain the difference between an island and a continent 6. Explain why the Sun is important to Earth The sun is a big ball of burning gas The sun is a star The sun has no atmosphere The sun ha		stion 6		
The Earth 1. The Earth is made up of water and land 2. The Earth is a planet 3. The Earth has an atmosphere 4. The Earth has living things 5. The Earth orbits around the sun 6. Is part/is not the centre of the solar system 7. The Earth does not produce its own heat and light, but gets it through radiation from the Sun LEVEL 3 – Question 7 1. Why is the Earth called the blue planet? 2. What is the surface of the Earth made of? 3. What is the Atmosphere important for life on earth? 4. Why is the atmosphere important for life on earth? 5. Explain the difference between an island and a continent 6. Explain why the Sun is important to Earth 7. The Sun has no atmosphere The sun has no living things on it—too hot. 7. The sun does not orbit 7. The sun obsente of the sun atmosphere of the sun is insportant of object. 7. The sun has no atmosphere The sun has no living things on it—too hot. 7. The sun has no atmosphere of the sun has no living things on it—too hot. 7. The sun has no atmosphere of the sun has no living things on it—too hot. 7. The sun has no atmosphere of the sun is in stand as star of living things on it—too hot. 7. The sun has no living things on it—too hot. 7. The sun has no atmosphere of the sun of orbit 7. The sun has no living things on it—too hot. 7. The sun has no atmosphere of the sun of orbit 7. The sun has no atmosphere of the sun of orbit 7. The sun has no atmosphere of the sun of orbit 7. The sun has no atmosphere of the sun of orbit 7. The sun has no atmosphere of the sun of orbit 7. The sun has no living things on it—too hot. 7. The sun has no living things on it—too hot. 7. The sun has no living things on it—too hot. 7. The sun has no living things on it—too hot. 7. The sun has no living things on it—too hot. 7. The sun has no living things on it—too hot. 7. The sun has no living things on it—too hot. 7. The sun has no living things on it—too hot. 7. The sun has no living things on it—too hot. 7. The sun has no living the solar sun it too hot. 7. The sun has no living the solar sun it to	Com	ipare the Sun and Earth	The Cour	
1. The Earth is a planet 2. The Earth has an atmosphere 3. The Earth has an atmosphere 4. The Earth has living things 5. The Earth hotits around the sun 6. Is part/is not the centre of the solar system 7. The Earth does not produce its own heat and light, but gets it through radiation from the Sun LEVEL 3 – Question 7 1. Why is the Earth called the blue planet? 2. What is the surface of the Earth made of? 3. What is the Atmosphere important for life on earth? 4. Why is the atmosphere important for life on earth? 5. Explain the difference between an island and a continent 1. Evel 3 – Question 7 Most of the Earth is covered in water and water looks blue or the Earth is made of water and land or continent 2. What is the surface of the Earth is a layer of air around the earth or life on earth? 3. What is the Atmosphere important for life on earth? 4. Why is the atmosphere important for life on earth? 5. Explain the difference between an island and a continent 6. Explain why the Sun is important to Earth 7. The sun has no atmosphere and has no antmosphere and the sun has no altwing things on it—too hot. 7. The sun has no altwing things on it—too hot. 7. The sun has no altwing things on it—too hot. 7. The sun face or orbit 7. The sun face or orbit 8. The sun has no altwing things on it—too hot. 7. The sun face or orbit 8. Authorsphere in Earth is made of water and a light 9. Atmosphere is a layer of air around the earth 9. Atmosphere has air orbits 9. An island is a small piece of land surrounded by water and a continent is a big piece of land orbits and most animals eat plants orb		The Footh		
water and land 2. The Earth is a planet 3. The Earth has an atmosphere 4. The Earth orbits around the sun 6. Is part/is not the centre of the solar system 7. The Earth does not produce its own heat and light, but gets it through radiation from the Sun LEVEL 3 – Question 7 1. Why is the Earth called the blue planet? 2. What is the surface of the Earth made of? 3. What is the Atmosphere important for life on earth? 4. Why is the atmosphere important for life on earth? 5. Explain the difference between an island and a continent 6. Explain why the Sun is important to Earth 7. The sun has no atmosphere The sun has no living things on it—too hot. The sun has no atmosphere The sun has no atmosphere of the sun has no living things on it—too hot. The sun has no atmosphere The sun has no atmosphere of the sun has no living things on it—too hot. The sun has no atmosphere of the solar sun has no living things on it—too hot. The sun does not orbit The sun is the centre of the solar system The sun does not orbit The sun be sun as the centre of the solar system The sun does not orbit The sun is the centre of the solar system The sun does not orbit The sun be solar system The sun does not orbit The sun stream living things on it—too hot. The sun is the centre of the solar system The sun does not orbit The sun be solar system The sun does not orbit The sun is the centre of the solar system The sun does not orbit The sun stream living things ent and light The sun stream living the solar system The sun does not orbit The sun stream living the solar system The sun does not orbit The sun stream living the solar system The sun store is through result in the solar system The sun store is the centre of the solar system The sun store is the centre of the solar system The sun store is the centre of the solar system The sun store is through result in the sun produces that solar system The sun store is the solar system The sun store is the solar system The sun	4 -			
2. The Earth is a planet 3. The Earth has an atmosphere 4. The Earth has living things 5. The Earth orbits around the sun 6. Is part/is not the centre of the solar system 7. The Earth does not produce its own heat and light, but gets it through radiation from the Sun LEVEL 3 – Question 7 1. Why is the Earth called the blue planet? 2. What is the surface of the Earth made of? 3. What is the Atmosphere? 4. Why is the Atmosphere important for life on earth? 5. Explain the difference between an island and a continent 6. Explain why the Sun is important to Earth 7. The sun has no living things on it — too hot. 7. The sun does not orbit 7. The sun is the centre of the solar system 7. The sun does not orbit 7. The sun is the centre of the solar system 7. The sun does not orbit 7. The sun is the centre of the solar system 7. The sun does not orbit 7. The sun is the centre of the solar system 7. The sun does not orbit 7. The sun is the centre of the solar system 7. The sun does not orbit 7. The sun is the centre of the solar system 7. The sun does not orbit 7. The sun does not orbit 7. The sun is the centre of the solar system 7. The sun does not orbit 7. The sun is the centre of the solar system 7. The sun does not orbit 7. The sun is the centre of the solar system 7. The sun does not orbit 7. The sun is the centre of the solar system 7. The sun is the centre of the solar system 7. The sun does not orbit 7. The sun does not orbit 7. The sun is the centre of the solar system 7. The sun is the centre of the solar system 7. The sun is the centre of the solar system 7. The sun is the centre of the solar system 7. The sun is the centre of the solar system 7. The sun is the centre of the solar system 8. The sun does not orbit 8. The sun does not orbit 8. The sun does not produces heat and light 9. The sun does not produces heat and light 9. The sun feature of the solar system 9. The sun does not produces heat and light 9. The sun feature of the solar system 9. The sun does not produces heat and light 9. The sun does not pr		•		
3. The Earth has an atmosphere 4. The Earth has living things 5. The Earth orbits around the sun 6. Is part/is not the centre of the solar system 7. The Earth does not produce its own heat and light, but gets it through radiation from the Sun LEVEL 3 – Question 7 1. Why is the Earth called the blue planet? 2. What is the surface of the Earth made of? 3. What is the Atmosphere important for life on earth? 4. Why is the atmosphere important for life on earth? 5. Explain the difference between an island and a continent 6. Explain why the Sun is important to Earth 1. EVEL 3 – Question 7 Most of the Earth is covered in water and water looks blue The surface of the Earth is made of water and land 4. Why is the atmosphere important for life on earth? 4. Why is the atmosphere obetween an island and a continent 4. Explain why the Sun is important to Earth 4. Explain why the Sun is important to Earth 4. Explain why the Sun is important to Earth 4. Explain why the Sun is important to Earth 4. Explain why the Sun is important to Earth 4. Explain why the Sun is important to Earth 4. Explain why the Sun is important to Earth 4. Explain why the Sun is important to Earth 4. Explain why the Sun is important to Earth			·	
atmosphere 4. The Earth has living things 5. The Earth orbits around the sun 6. Is part/is not the centre of the solar system 7. The Earth does not produce its own heat and light, but gets it through radiation from the Sun LEVEL 3 – Question 7 1. Why is the Earth called the blue planet? 2. What is the surface of the Earth made of? 3. What is the Atmosphere? 4. Why is the atmosphere important for life on earth? 5. Explain the difference between an island and a continent 6. Explain why the Sun is important to Earth 7. The sun does not orbit The sun is is the centre of the solar system The sun produces heat and light 7. The Earth orbits around it he sun produces heat and light 8. (6x1=6) (14) 8. Why is the Earth called the blue planet? 9. Most of the Earth is covered in water and water looks blue? 9. The surface of the Earth is made of water and land? 9. Atmosphere is a layer of air around the earth? 9. Living things on Earth need air and the atmosphere has air? 9. An island is a small piece of land surrounded by water and a continent is a big piece of land? 9. Explain the difference between an island and a continent or make their own food and most animals eat plants? 1. Explain why the Sun is important to Earth 1. Explain why the Sun is important to Earth		•	5 5	
4. The Earth has living things 5. The Earth orbits around the sun 6. Is part/is not the centre of the solar system 7. The Earth does not produce its own heat and light, but gets it through radiation from the Sun LEVEL 3 – Question 7 1. Why is the Earth called the blue planet? 2. What is the surface of the Earth made of? 3. What is the Atmosphere? 4. Why is the atmosphere important for life on earth? 5. Explain the difference between an island and a continent 6. Explain why the Sun is important to Earth 6. Explain why the Sun is important to Earth The sun is the centre of the solar system The sun is the centre of the solar system The sun is the centre of the solar system The sun is the centre of the solar system The sun produces heat and light (6x1=6) (144) The sun produces heat and light The sun produces heat and light (6x1=6) (144) The sun produces heat and light The sun produces heat and light (6x1=6) (144) The sun produces heat and light (6x1=6) (144) The sun produces heat and light (6x1=6) (144) The sun produce is own foot and surfact light The sun produces heat and light (6x1=6) (144) The sun produces heat and light (6x1=6) (144) The sun produce is own foot and surfact light The sun produce is own foot and surfact light The sun produce is own foot and surfact light The sun produce is own foot and surfact light The sun produce is own foot and surfact light The sun produce is own foot and surfact light The sun produce is own foot and surfact light The sun produce is own foot and surfact light The sun produce is own foot and surfact light The sun produce is				
things 5. The Earth orbits around the sun 6. Is part/is not the centre of the solar system 7. The Earth does not produce its own heat and light, but gets it through radiation from the Sun LEVEL 3 – Question 7 1. Why is the Earth called the blue planet? 2. What is the surface of the Earth made of? 3. What is the Atmosphere? 4. Why is the atmosphere important for life on earth? 5. Explain the difference between an island and a continent Atmosphere is a layer of air around the atmosphere has air An island is a small piece of land surrounded by water and a continent - Provides heat & light - Living things eat, plants need the sun to make their own food and most animals eat plants 3. What is mportant to Earth 4. Explain why the Sun is important to Earth 5. Explain why the Sun is important to Earth 4. Explain why the Sun is important to Earth 5. Explain why the Sun is important to Earth 5. Explain why the Sun is important to Earth 5. Explain why the Sun is important to Earth 5. Explain why the Sun is important to Earth 6. Explain why the Sun is important to Earth		•		
5. The Earth orbits around the sun 6. Is part/is not the centre of the solar system 7. The Earth does not produce its own heat and light, but gets it through radiation from the Sun LEVEL 3 – Question 7 1. Why is the Earth called the blue planet? 2. What is the surface of the Earth made of? 3. What is the Atmosphere important for life on earth? 4. Why is the atmosphere important for life on earth? 5. Explain the difference between an island and a continent 5. Explain why the Sun is important to Earth 6. Explain why the Sun is important to Earth The sun produces heat and light (6x1=6) (14) The sun produces heat and light (6x1=6) (14) Advestion 7 An earth is covered in water and water looks blue or the Earth is made of water and land or water and sale water and land or water and land or water and sale water and land or water and and surface of the Earth is made of water and and the earth or water and land or water and light An island is a small piece of land or continent is a big piece of land or living things eat, plants need the sun to make their own food and most animals eat plants or living things eat, plants need the sun to make their own food and most animals eat plants or living things eat plan				
the sun 6. Is part/is not the centre of the solar system 7. The Earth does not produce its own heat and light, but gets it through radiation from the Sun LEVEL 3 – Question 7 1. Why is the Earth called the blue planet? 2. What is the surface of the Earth made of? 3. What is the Atmosphere? 4. Why is the atmosphere important for life on earth? 5. Explain the difference between an island and a continent The surface of the Earth is made of water and land water looks blue water and land water and water looks blue water and land water looks blue water and land water and water looks blue water and land water and water looks blue water and land water and water looks blue water and land water looks blue water and land water and water looks blue water and land water looks blue water and land water looks blue water looks blue water and land water looks blue water looks blue water looks blue water and land water looks blue water looks blue water and land water looks blue water and land water looks blue water and land water looks blue water a		•	_	
6. Is part/is not the centre of the solar system 7. The Earth does not produce its own heat and light, but gets it through radiation from the Sun LEVEL 3 – Question 7 1. Why is the Earth called the blue planet? 2. What is the surface of the Earth made of? 3. What is the Atmosphere important for life on earth? 4. Why is the atmosphere important for life on earth? 5. Explain the difference between an island and a continent 6. Explain why the Sun is important to Earth 7. The Earth does not produce its wheat and light, but gets it through radiation from the Sun Most of the Earth is covered in water and water looks blue. The surface of the Earth is made of water and land. Atmosphere is a layer of air around the earth. 3. Living things on Earth need air and the atmosphere has air. 4. Why is the atmosphere important for life on earth? 4. Why is the atmosphere earth? 5. Explain the difference between an island and a continent is a big piece of land. 5. Explain why the Sun is important to Earth 3. The surface of the Earth is made of water and a surface of the Earth is made of water and surface of the Earth is made of water and surface of the Earth is made of water and surface of the Earth is made of water and surface of the Earth is made of water and surface of the Earth is made of water and surface of the Earth is made of water and surface of the Earth is made of water and water looks blue. The surface of the Earth is made of water and surface of the Earth is made of water and water looks blue. The surface of the Earth is made of water and water looks blue. The surface of the Earth is made of water and water looks blue. The surface of the Earth is made of water and water and water looks blue. The surface of the Earth is made of water and water and water and water and water looks blue. The surface of the Earth is made of water and water and water and water looks blue. The surface of the Earth is made of water and water looks blue. The surface of the Earth is made of water and water looks blue.	5. T	he Earth orbits around	The sun produces heat and light	
The Earth does not produce its own heat and light, but gets it through radiation from the Sun LEVEL 3 – Question 7 1. Why is the Earth called the blue planet? 2. What is the surface of the Earth made of? 3. What is the Atmosphere important for life on earth? 4. Why is the atmosphere important for life on earth? 5. Explain the difference between an island and a continent 5. Explain why the Sun is important to Earth 6. Explain why the Sun is important to Earth 7. The Earth does not produce its own heat and light, but gets it through (fax1=6)	th	ne sun		
7. The Earth does not produce its own heat and light, but gets it through radiation from the Sun LEVEL 3 – Question 7 1. Why is the Earth called the blue planet? 2. What is the surface of the Earth made of? 3. What is the Atmosphere? 4. Why is the atmosphere important for life on earth? 5. Explain the difference between an island and a continent 5. Explain why the Sun is important to Earth 6. Explain why the Sun is important to Earth 7. Most of the Earth is covered in water and water looks blue 7. The surface of the Earth is made of water and land 9. The surface of the Earth is made of water and land 9. The surface of the Earth is made of water and land 9. The surface of the Earth is made of water and land 9. The surface of the Earth is made of water and land 9. The surface of the Earth is made of water and land 9. The surface of the Earth is made of water and land 9. The surface of the Earth is made of water and land 9. The surface of the Earth is made of water and land 9. The surface of the Earth is made of water and land 9. The surface of the Earth is made of water and land 9. The surface of the Earth is made of water and land 9. The surface of the Earth is made of water and land 9. The surface of the Earth is made of water and land 9. The surface of the Earth is made of water and land 9. The surface of the Earth is made of water and land 9. The surface of the Earth is made of water and land 9. The surface of the Earth is a layer of air around 1. The surface of the Earth is a layer of air around 1. The surface of the Earth is a layer of air around 1. The surface of the Earth is a layer of air around 1. The surface of the Earth is a layer of air around 1. The surface of the Earth is a layer of air around 1. The surface of the Earth is a layer of air around 1. The surface of the Earth is a layer of air around 1. The surface of the Earth is a layer of air around 1. The surface of the Earth is a layer of air around 1. The surface of the Earth is a layer of air around 1. The surface of the Earth is a lay	6. Is	s part/is not the centre of		
produce its own heat and light, but gets it through radiation from the Sun LEVEL 3 – Question 7 1. Why is the Earth called the blue planet? 2. What is the surface of the Earth made of? 3. What is the Atmosphere? 4. Why is the atmosphere important for life on earth? 5. Explain the difference between an island and a continent 5. Explain why the Sun is important to Earth 6. Explain why the Sun is important to Earth LEVEL 3 – Question 7 Most of the Earth is covered in water and water looks blue ~ The surface of the Earth is made of water and land ~ Atmosphere is a layer of air around the atmosphere has air ~ 3. Living things on Earth need air and the atmosphere has air ~ 4. Why is the atmosphere important for life on earth? 4. Why is the atmosphere the as air ~ An island is a small piece of land surrounded by water and a continent is a big piece of land ~ 5. Explain why the Sun is important to Earth 3. An island is a small piece of land surrounded by water and a continent is a big piece of land ~ 5. Explain the difference between an island and a continent and the sun to make their own food and most animals eat plants ~ 3. An island is a small piece of land surrounded by water and a continent is a big piece of land ~ 4. Explain the difference between an island and a continent is a big piece of land ~ 5. Explain why the Sun is important to Earth	th	ne solar system		
LEVEL 3 – Question 7 1. Why is the Earth called the blue planet? 2. What is the surface of the Earth made of? 3. What is the Atmosphere? 4. Why is the atmosphere important for life on earth? 5. Explain the difference between an island and a continent 6. Explain why the Sun is important to Earth LEVEL 3 – Question 7 Most of the Earth is covered in water and water looks blue. The surface of the Earth is made of water and land. Atmosphere is a layer of air around the earth. 3. Living things on Earth need air and the atmosphere has air. 4. Why is the atmosphere important for life on earth? 5. Explain the difference between an island and a continent. 6. Explain why the Sun is important to Earth. 3. The Surface of the Earth is covered in water and water looks blue. The surface of the Earth is made of water and sand water and sand and a sand water and sand and a continent is a layer of air around the atmosphere has air. 3. Living things on Earth need air and the atmosphere has air. 4. Provides heat & light. - Provides heat & light. - Living things eat, plants need the sun to make their own food and most animals eat plants. 3. The surface of the Earth is made of water and sand water looks blue. The surface of the Earth is made of water and sand water looks blue. The surface of the Earth is made of water and sand water looks blue. The surface of the Earth is made of water and sand water looks blue. The surface of the Earth is covered in water looks blue. The surface of the Earth is covered in water looks blue. The surface of the Earth is covered in water looks blue. The surface of the Earth is and water looks blue. The surface of the Earth is and water looks blue. The surface of the Earth is made of water and sand water looks blue. The surface of the Earth is made of water and sand water looks blue. The surface of the Earth is made of water and sand water looks blue.	7. T	he Earth does not		
1. Why is the Earth called the blue planet? 2. What is the surface of the Earth made of? 3. What is the Atmosphere important for life on earth? 4. Why is the atmosphere important for life on earth? 5. Explain the difference between an island and a continent 6. Explain why the Sun is important to Earth 1. Why is the Earth called water and water looks blue The surface of the Earth is made of water and water looks blue The surface of the Earth is made of water and land 4. Why is the atmosphere important for life on earth? 4. Why is the atmosphere important to Earth 5. Explain the difference between an island and a continent and the atmosphere thas air 6. Explain why the Sun is important to Earth 3. What is the surface of the Earth is covered in water and water looks blue The surface of the Earth is made of water and land 4. Why is the atmosphere is a layer of air around the atmosphere has air 5. Explain the difference between an island and a continent and the atmosphere and a continent and the atmosphere has air 6. Explain why the Sun is important to Earth	рі	roduce its own heat and		(6x1=6)
1. Why is the Earth called the blue planet? 2. What is the surface of the Earth made of? 3. What is the Atmosphere important for life on earth? 4. Why is the atmosphere important for life on earth? 5. Explain the difference between an island and a continent 6. Explain why the Sun is important to Earth 1. Why is the Earth called water and water looks blue The surface of the Earth is made of water and water looks blue The surface of the Earth is made of water and land 4. Why is the atmosphere important for life on earth? 4. Why is the atmosphere important to Earth 5. Explain the difference between an island and a continent and the atmosphere thas air 6. Explain why the Sun is important to Earth 3. What is the surface of the Earth is covered in water and water looks blue The surface of the Earth is made of water and land 4. Why is the atmosphere is a layer of air around the atmosphere has air 5. Explain the difference between an island and a continent and the atmosphere and a continent and the atmosphere has air 6. Explain why the Sun is important to Earth	liç	ght, but gets it through		(14)
1. Why is the Earth called the blue planet? 2. What is the surface of the Earth made of? 3. What is the Atmosphere? 4. Why is the atmosphere important for life on earth? 5. Explain the difference between an island and a continent 6. Explain why the Sun is important to Earth Most of the Earth is covered in water and water looks blue. The surface of the Earth is made of water and land. Atmosphere is a layer of air around the earth. 3. What is the Atmosphere important for life on earth? An island is a small piece of land surrounded by water and a continent is a big piece of land. - Provides heat & light - Living things eat, plants need the sun to make their own food and most animals eat plants. 6. Explain why the Sun is important to Earth 3. Atmosphere is a layer of air around the atmosphere has air. 3. Atmosphere is a layer of air around the atmosphere has air. 3. Atmosphere is a layer of air around the atmosphere has air. 3. Living things on Earth need air and the atmosphere has air. 4. Continued the atmosphere is a layer of air around and the atmosphere has air. 3. Atmosphere is a layer of air around the atmosphere has air. 3. An island is a small piece of land surrounded by water and a continent is a big piece of land. 4. Explain the difference between an island and a continent is a big piece of land. 4. Explain the difference between an island and a continent is a big piece of land.				
1. Why is the Earth called the blue planet? 2. What is the surface of the Earth made of? 3. What is the Atmosphere? 4. Why is the atmosphere important for life on earth? 5. Explain the difference between an island and a continent 6. Explain why the Sun is important to Earth Most of the Earth is covered in water and water looks blue. The surface of the Earth is made of water and land. Atmosphere is a layer of air around the earth. 3. What is the Atmosphere important for life on earth? An island is a small piece of land surrounded by water and a continent is a big piece of land. - Provides heat & light - Living things eat, plants need the sun to make their own food and most animals eat plants. 6. Explain why the Sun is important to Earth 3. Atmosphere is a layer of air around the atmosphere has air. 3. Atmosphere is a layer of air around the atmosphere has air. 3. Atmosphere is a layer of air around the atmosphere has air. 3. Living things on Earth need air and the atmosphere has air. 4. Continued the atmosphere is a layer of air around and the atmosphere has air. 3. Atmosphere is a layer of air around the atmosphere has air. 3. An island is a small piece of land surrounded by water and a continent is a big piece of land. 4. Explain the difference between an island and a continent is a big piece of land. 4. Explain the difference between an island and a continent is a big piece of land.				
1. Why is the Earth called the blue planet? 2. What is the surface of the Earth made of? 3. What is the Atmosphere? 4. Why is the atmosphere important for life on earth? 5. Explain the difference between an island and a continent 6. Explain why the Sun is important to Earth Most of the Earth is covered in water and water looks blue. The surface of the Earth is made of water and land. Atmosphere is a layer of air around the earth. 3. What is the Atmosphere important for life on earth? An island is a small piece of land surrounded by water and a continent is a big piece of land. - Provides heat & light - Living things eat, plants need the sun to make their own food and most animals eat plants. 6. Explain why the Sun is important to Earth 3. Atmosphere is a layer of air around the atmosphere has air. 3. Atmosphere is a layer of air around the atmosphere has air. 3. Atmosphere is a layer of air around the atmosphere has air. 3. Living things on Earth need air and the atmosphere has air. 4. Continued the atmosphere is a layer of air around and the atmosphere has air. 3. Atmosphere is a layer of air around the atmosphere has air. 3. An island is a small piece of land surrounded by water and a continent is a big piece of land. 4. Explain the difference between an island and a continent is a big piece of land. 4. Explain the difference between an island and a continent is a big piece of land.				
1. Why is the Earth called the blue planet? 2. What is the surface of the Earth made of? 3. What is the Atmosphere? 4. Why is the atmosphere important for life on earth? 5. Explain the difference between an island and a continent 6. Explain why the Sun is important to Earth Most of the Earth is covered in water and water looks blue. The surface of the Earth is made of water and land. Atmosphere is a layer of air around the earth. 3. What is the Atmosphere important for life on earth? Atmosphere is a layer of air around the earth 3 Living things on Earth need air and the atmosphere has air 4. Why is the atmosphere important for life on earth? An island is a small piece of land surrounded by water and a continent is a big piece of land - Provides heat & light - Living things eat, plants need the sun to make their own food and most animals eat plants 6. Explain why the Sun is important to Earth 3 Living things on Earth need air and the atmosphere has air - Provides heat & light - Living things eat, plants need the sun to make their own food and most animals eat plants 3 4. Why is the atmosphere is a layer of air around the earth 3 4. Living things on Earth need air and the atmosphere has air 3 4. Explain the difference between an island and a continent is a big piece of land - Provides heat & light - Living things eat, plants need the sun to make their own food and most animals eat plants 3			water and land	
3. What is the Atmosphere? 4. Why is the atmosphere important for life on earth? 5. Explain the difference between an island and a continent 6. Explain why the Sun is important to Earth 1. Why is the atmosphere important for life on earth? 2. Living things on Earth need air and the atmosphere has air 3. An island is a small piece of land surrounded by water and a continent is a big piece of land 4. Unique things on Earth need air and the atmosphere has air 4. Living things eat a small piece of land surrounded by water and a continent is a big piece of land 4. Unique things on Earth need air and the atmosphere has air 5. Explain the difference between an island and a continent is a big piece of land 6. Explain why the Sun is important to Earth 3. An island is a small piece of land surrounded by water and a continent is a big piece of land 6. Explain why the Sun is important to Earth 3. An island is a small piece of land surrounded by water and a continent is a big piece of land 6. Explain why the Sun is important to Earth 3. An island is a small piece of land surrounded by water and a continent is a big piece of land 6. Explain the difference and a continent is a big piece of land surrounded by water and a continent is a big piece of land surrounded by water and a continent is a big piece of land surrounded by water and a continent is a big piece of land surrounded by water and a continent is a big piece of land surrounded by water and a continent is a big piece of land surrounded by water and a continent is a big piece of land surrounded by water and a continent is a big piece of land surrounded by water and a continent is a big piece of land surrounded by water and a continent is a big piece of land surrounded by water and a continent is a big piece of land surrounded by water and a continent is a big piece of land surrounded by water and a continent is a big piece of land surrounded by water and a continent is a big piece of land surrounded by water and a continent is a big piece of land surr	_	arti mado or.	Atmosphere is a layer of air around	3
 3. What is the Atmosphere? 4. Why is the atmosphere important for life on earth? 5. Explain the difference between an island and a continent 6. Explain why the Sun is important to Earth 3. Living things on Earth need air and the atmosphere has air 3. An island is a small piece of land surrounded by water and a continent is a big piece of land 4. Living things eat & light 5. Explain the difference between an island and a continent is a big piece of land 6. Explain why the Sun is important to Earth 3. An island is a small piece of land surrounded by water and a continent is a big piece of land 6. Explain why the Sun is important to Earth 				
4. Why is the atmosphere important for life on earth? 4. Why is the atmosphere important for life on earth? 5. Explain the difference between an island and a continent - Provides heat & light - Living things eat, plants need the sun to make their own food and most animals eat plants 6. Explain why the Sun is important to Earth 3 4. Living things on Earth need air and the atmosphere has air 4. An island is a small piece of land surrounded by water and a continent is a big piece of land surrounded by w	3 1/	What is the Atmosphere?	the earth	
4. Why is the atmosphere important for life on earth? 4. Why is the atmosphere important for life on earth? An island is a small piece of land surrounded by water and a continent is a big piece of land. 5. Explain the difference between an island and a continent - Provides heat & light - Living things eat, plants need the sun to make their own food and most animals eat plants. 6. Explain why the Sun is important to Earth 3 6. Explain why the Sun is important to Earth	J. V	viiat is the Atmosphere:		3
 4. Why is the atmosphere important for life on earth? 5. Explain the difference between an island and a continent 6. Explain why the Sun is important to Earth the atmosphere has air An island is a small piece of land surrounded by water and a continent is a big piece of land - Provides heat & light - Living things eat, plants need the sun to make their own food and most animals eat plants 			Niving things on Fauth was dair and	
 4. Why is the atmosphere important for life on earth? 5. Explain the difference between an island and a continent 6. Explain why the Sun is important to Earth 3 An island is a small piece of land surrounded by water and a continent is a big piece of land ✓ - Provides heat & light - Living things eat, plants need the sun to make their own food and most animals eat plants ✓ 3 An island is a small piece of land surrounded by water and a continent is a big piece of land ✓ - Provides heat & light - Living things eat, plants need the sun to make their own food and most animals eat plants ✓ 			•	
important for life on earth? An island is a small piece of land surrounded by water and a continent is a big piece of land - Provides heat & light - Living things eat, plants need the sun to make their own food and most animals eat plants 6. Explain why the Sun is important to Earth 3	4 14	Vby is the stmoonhare	tne atmosphere has air 🗸	
surrounded by water and a continent is a big piece of land ✓ 5. Explain the difference between an island and a continent - Provides heat & light - Living things eat, plants need the sun to make their own food and most animals eat plants ✓ 6. Explain why the Sun is important to Earth 3) s
 5. Explain the difference between an island and a continent 6. Explain why the Sun is important to Earth continent is a big piece of land Provides heat & light Living things eat, plants need the sun to make their own food and most animals eat plants 3 	l in	inportant for life on earth?	•	
 5. Explain the difference between an island and a continent 6. Explain why the Sun is important to Earth Frovides heat & light Living things eat, plants need the sun to make their own food and most animals eat plants ✓ 3 3 			_	
between an island and a continent - Living things eat, plants need the sun to make their own food and most animals eat plants 6. Explain why the Sun is important to Earth 3			continent is a big piece of land ✓	
between an island and a continent - Living things eat, plants need the sun to make their own food and most animals eat plants 6. Explain why the Sun is important to Earth 3		the late of the second
